STRENGTHS Though hailing from a remote village in Kerala, I withstood stiff competition and got selected in the Jawahar Navodaya Vidyalaya (an initiative of the Central Government) where I studied from Class 6 to 10 as a resident scholar.

This break gave me the much-needed exposure and refined my outlook and world-view. Apart from sowing the seeds of teamwork and self-reliance in me, it developed my communication skills and leadership qualities. It also moulded my personality and outlook.

While studying there, I was selected for the Student Exchange Programme and deputed for a year to the parallel institution in Jaunpur (Uttar Pradesh). This exposure at an early age imparted adaptability to a different geography, climate, language and culture.

I can take pride in my consistently excellent academic record, which, along with the above qualities, helped me embark of the project "Farmgraze" for my graduation.

Apart from English, I am proficient in Malayalam which is my mother-tongue and Hindi.

My interest is in Python programming and C++, but being a quick learner, can migrate to any other field or role.

I am focused, committed, task-oriented and sincere.
